

CAPRARA UNDERSIGNES THE QUALITY

PRIME-MELON L

PHYTO-ENERGETIC NUTRIENT

COMPOSITION

Phosphoric Anhydride (P₂O₅) water-soluble
Potassium Oxide (K₂O) water-soluble

8,5 % w/w
13 % w/w

FORMULATION

POWDER

FEATURES

PRIME-MELON is an energetic natural formulation having high stimulating power thanks to the wide variety of biologically active substances which have been obtained through the most updated biotechnological extraction processes from vegetal productions.

PRIME MELON brings to the fruit all necessary substances for activating the physiological processes as to:

- **GAUGE** by improving the uniformity and the size of the fruits.
- **MARKS** by increasing the marks of the melon which, when ripening, gets a proper appearance for the market.
- **YIELD** a better yield of the crop is obtained.
- **STRUCTURE AND DURABILITY** by improving the durability of the fruits during stockage in the destination markets.
- **TASTE** by improving the production of sugars which enable the melon to become sweeter.

USAGE

FOLIAR TREATMENT

DOSAGE AND FIELD OF USE	APPLICATION PLAN
MELONS	<p>150-250 grs/hl</p> <p>1st treatment when the fruit has a diameter of 8-10 cm.</p> <p>Treatment to be repeated after 10-12 days as per crops conditions.</p>
